**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Letters (f)-(h) of claims 5 and 7 are written in such a way including several grammatical errors that it is unclear as to what is actually being claimed. The "contact area" needs to be defined. The subject material of (f)-(h) is also present in claims 6 and 8 and needs amended to clearly define what is being claimed.
4. Claims 5 and 7 recite the limitation "the sticking force" in line 8. There is insufficient antecedent basis for this limitation in the claim. The Examiner notes that there is no prior reference in the claims to anything related to the suction device. The Examiner also notes that the claims essentially read as: "a moving carrier comprising..." because "that sticks to the surface of an object by use of negative pressure" is functional language. The phrase "consisting of" should be replaced with "comprising". See MPEP 2111.03.

5. Claims 5-8 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: anything related to the suction device such as the suction hose, suction disk, cylindrical case, etc. The Examiner notes that the invention is a suction adhering device but no such elements are claimed. As claimed the invention is simply a small vehicle with caterpillar belts on each side which already exists. Claims 5 and 7 need to specifically claim structural elements relating to the suction device.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
